SUMMARY

I am a third-year Computer Science student at VNU University of Engineering and Technology (VNU-UET), expected to graduate in early 2027. Proficient with frameworks such as Next.js, Spring, and Echo, and tools including Docker and Linux, with experience in debugging and problem solving, version control using Git, and API design and development (RESTful, GraphQL). Additional strengths include the ability to self-learn and research new technologies, along with effective communication and teamwork.

EDUCATION

VNU University of Engineering and Technology (VNU-UET) <i>Bachelor of Computer Science; GPA: 3.45/4.0 (Expected graduation: early 2027)</i>	Hanoi, Vietnam <i>Sep 2023 – Present</i>
---	---

HONORS & AWARDS

UET Campathon 2025 <i>VNU University of Engineering and Technology (VNU-UET)</i> - Received the Potential AI Award with a safety LLM input solution - Achieved 2nd Prize in the competition	Aug 2025 <i>Hanoi, Vietnam</i>
---	-----------------------------------

EXPERIENCE

Fullstack Developer Intern <i>VNU University of Engineering and Technology (VNU-UET)</i> - Contributed to the design and development of the subsystem at VNU-UET for more than 10,000 student with Spring and MariaDB. - Implement Strategy pattern and applied cache for export generation time optimization by 75%.	Nov 2025 – Present <i>Hanoi, Vietnam</i>
--	---

PROJECTS

Shopiew <i>Microservices, Event-driven Marketplace Platform</i> - Applied closure table pattern in product categories design for hierarchy structure efficiency - Applied Saga pattern to ensure best-effort ACID transaction across order-related flows and implemented Outbox pattern for reliable messaging - Applied Cache-aside pattern with Redis improving catalog request throughput by 30% - Implemented chat service in Go using pub/sub for concurrency efficiency - Mitigated the N+1 query problem - Integrated Envoy Gateway and OPA for authentication, authorization, and routing - Integrated Gemini chatbot for product recommendation - Deployed microservices using K3s; monorepo managed with Turborepo Frontend Technologies: Next.js, Zustand, Shadcn/ui, Vue.js, Pinia, TailwindCSS, Tiptap Backend Technologies: Spring, Echo, FastAPI, Envoy, OPA, Kafka, Debezium, PostgreSQL, Redis, MinIO	July 2025 – Present
Gemidical <i>Hybrid multi-agent system for general medicine</i> - Built a hybrid multi-agent system (hierarchical + vertical) for medical chatbot consultation and appointment scheduling - Decomposed tasks into 10 specialized agents - Applied agentic patterns: Tool-use, Self-reflection, Planning - Backend implemented with FastAPI using RAG pipelines and Pinecone vector database Tech stack: FastAPI, LangGraph, LangChain, React.js, MongoDB	Oct 2025 – Dec 2025

TECHNICAL SKILLS

Languages: Javascript/TypeScript (2-year), Java (1-year), Go (Golang), Python, Nodejs, C/C++, SQL
Distributed Systems & Backend: Kafka, Debezium, RabbitMQ, Spring Boot Javascript/TypeScript (1-year), Echo (Go), Expressjs, FastAPI, Envoy Proxy, Open Policy Agent, CQRS, Saga Pattern, Outbox Pattern
AI Infrastructure & LLMs: LangGraph, LangChain, RAG Pipelines, Multi-agent Systems
Storage & Databases: PostgreSQL, Redis (cache, stream), MinIO, MariaDB, Mysql
DevOps & Infrastructure: Linux, Docker, K3s, Git, Turborepo
